Zwane Financial Services t/a Zwane Financial Services is an authorised Financial Services Provider and registered Credit Provider (NCRCP13510). © 2026 Zwane Financial Services. All rights reserved.

After login, you will land on the **Dashboard**.

1.2 User Roles

The admin portal supports several roles:

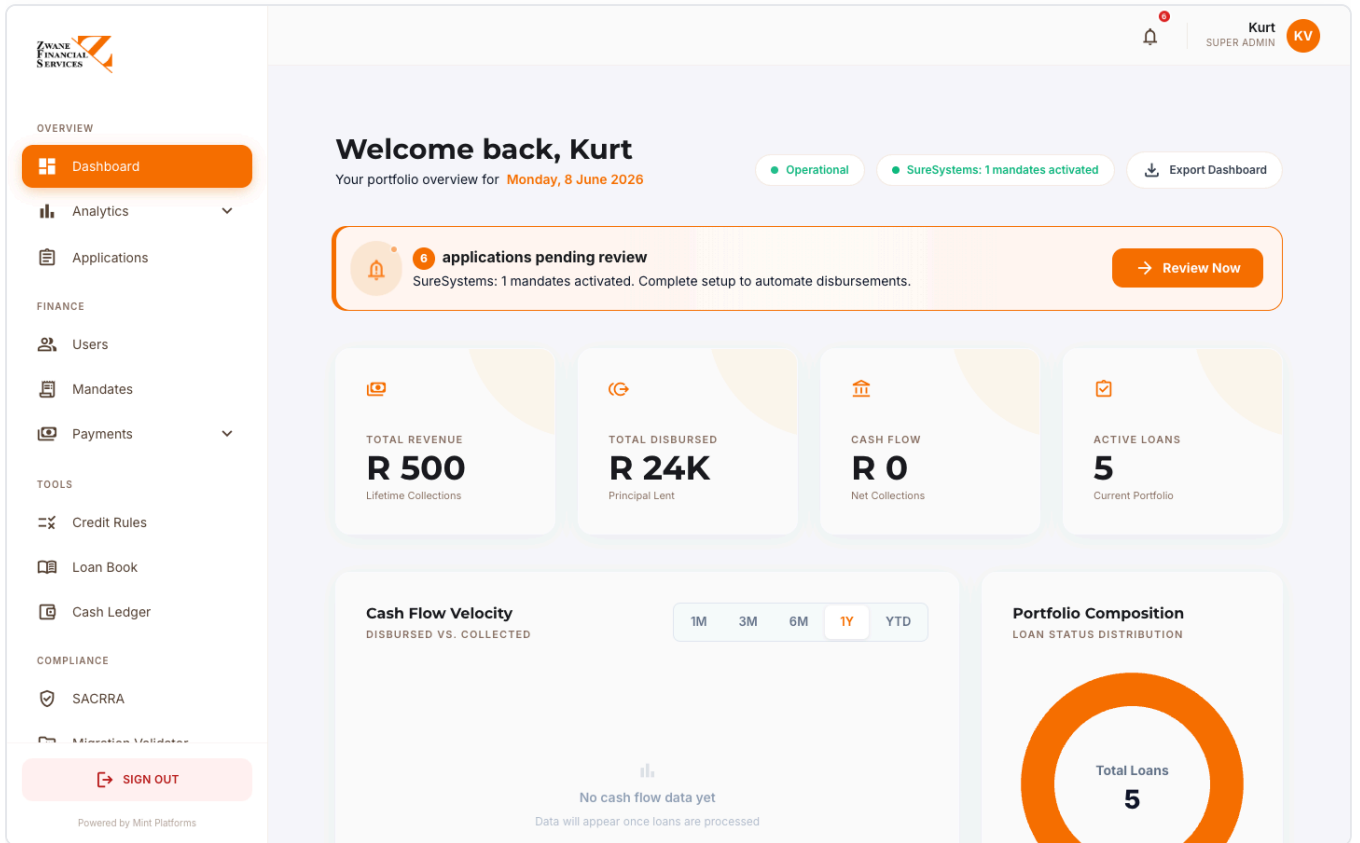

Role	What they can do
Super Admin	Full access — all branches, all settings, all data
Admin / Owner	Full operational access except billing-level system settings
Branch Admin	Manage applications, payments and clients for their assigned branch only
Branch Staff	View applications and clients for their branch, capture new applications
Borrower	Cannot access the admin portal (uses the client app instead)

Roles are assigned by a Super Admin via the **Users** page → **Staff & Admins** tab.

1.3 The Layout

Every admin page has the same layout:

- **Left sidebar** — navigation between modules
- **Top right** — your profile, notifications, sign out
- **Main area** — the page content
- **Logo top-left** — click any time to return to the Dashboard

2. Dashboard

URL: `/admin/dashboard`

The Dashboard is the home page — a snapshot of how the business is performing right now.

2.1 What you see

Welcome header — your name and today's date.

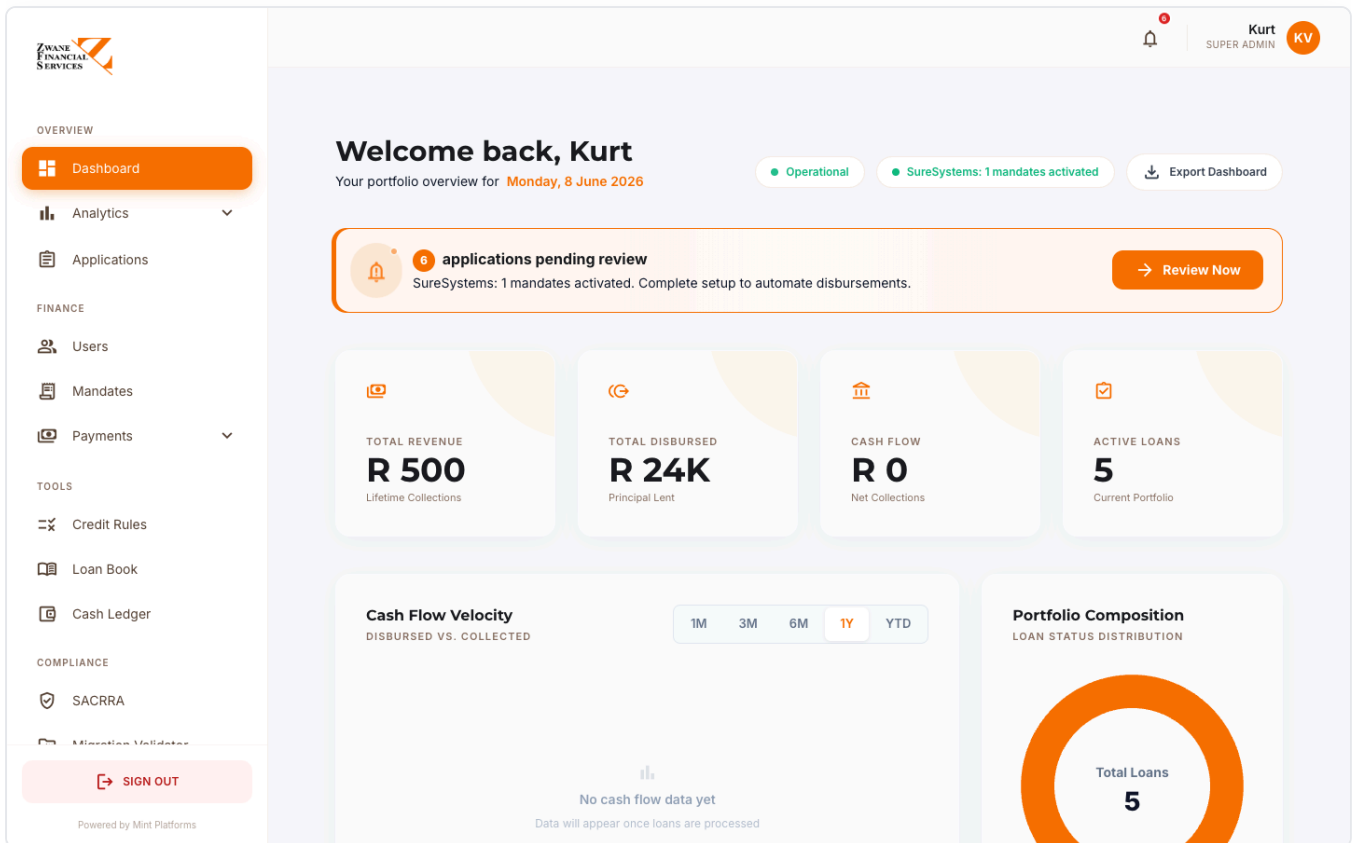

Action banner (only appears if there is work to do) — shows pending applications waiting for review. Click "Review Now" to jump straight to the Applications page.

KPI cards (4 across the top)

KPI	What it means
Total Revenue	Lifetime collections — all repayments received
Total Disbursed	Principal lent out across all loans
Cash Flow	Net collections this period
Active Loans	Number of loans currently being repaid

Charts

- **Cash Flow Velocity** — money out vs money in by month, with 1M / 3M / 6M / 1Y / YTD tabs
- **Portfolio Composition** — donut showing loan status breakdown (Disbursed / In Arrears / In Default / Settled)
- **Vintage Analysis** — recovery rate by cohort (which months had the best repayment performance)
- **Risk Matrix** — bubble chart of credit score vs DTI ratio
- **Conversion Funnel** — application pipeline (Started → Processing → Finalising → Ready)
- **Portfolio Growth** — principal vs interest over time
- **Performance Targets** — radial showing profit margin, portfolio health, recovery rate
- **Revenue Trajectory** — total exposure growth
- **Historical Trends** — long-term performance metrics

2.2 Status indicators (header row)

Two pill-shaped indicators show **system health**:

- **Operational / System Error** — backend status
- **SureSystems: Connected** — DebiCheck integration status

2.3 Export Dashboard

Click **Export Dashboard** (top right) to download a CSV with all KPI values, pipeline summary, and current portfolio metrics. Useful for board reports.

3. Applications

URL: `/admin/applications`

The Applications page is your **work queue** — every loan application coming through the system.

3.1 What you see

Filter bar at top:

- **Status tabs** — All / New / Processing / Approved / Disbursed / Rejected / Settled
- **Branch filter** — drop-down to filter by branch
- **Search** — by name, ID, reference number
- **Date range** — From / To
- **+ Create Application** — start a walk-in application

Application table:

Column	Notes
Ref	Application reference (e.g. C0001-L0042)
Client	Full name + ID number
Branch	Where the application was captured
Amount	Loan amount requested
Status	Coloured badge — see legend below
Credit Score	Bureau score with risk band colour
Created	When the application started
Actions	View / Edit / Approve / Decline

3.2 Status legend

Status	Meaning
 STARTED	Client just began the application
 BUREAU_CHECKING	Credit check in progress
 BUREAU_OK	Credit check passed
 BUREAU_REFER	Credit check flagged for review
 BANK_LINKING	Bank statement upload in progress
 AFFORD_OK	Affordability passed
 AFFORD_REFER	Affordability flagged
 OFFERED	Loan offer made to client
 OFFER_ACCEPTED	Client accepted the offer
 CONTRACT_SIGN	Contract sent for signing
 DEBICHECK_AUTH	Mandate sent for client authorisation
 APPROVED	Ready to disburse
 DISBURSED	Money paid out
 IN_ARREARS	Payment overdue
 IN_DEFAULT	More than 30 days overdue
 SETTLED	Loan paid off
 REJECTED	Declined
 CANCELLED	Client withdrew

3.3 Capturing a new walk-in application

Click **+ Create Application**. The wizard has 3 steps:

1. **Client details** — search by ID number to see if they already exist; if not, capture their personal details, address, employer, NOK
2. **Loan details** — amount, term, purpose, frequency
3. **Bank account** — for DebiCheck mandate setup

Submit to land the application in the queue at status **STARTED** .

Showing all records
 Showing 6 records

4. Application Detail

URL: `/admin/application-detail?id=<application_id>`

Click any row in Applications to open the **detail page** — the most important page in the system. This is where most work happens.

4.1 Left side — client information

Tabs:

- **Personal** — Name, ID, DOB, gender, address. Editable, with a Save button.
- **Next of Kin** — Name, relationship, phone. Editable, with a Save button.
- **Employer** — Employer name, phone, address. Editable, with a Save button.
- **Bank Account** — Bank name, account number, branch code, holder name.
- **Documents** — Uploaded files (ID, bank statement, payslip, till slip). Click to download.

4.2 Right side — application data

Status banner — Current status and history. Click to see all status changes with timestamps.

Financial Snapshot:

- Loan amount, term, monthly instalment, total repayable
- All fees broken out (initiation, service, CPI, VAT, interest)
- Credit Life Insurance (if applicable)

Affordability:

- Gross income, expenses, disposable income
- Two income source checkboxes (Salary / Other) — toggle to see what affordability looks like with/without each
- Affordability ratio with traffic-light indicator

Credit Check:

- Bureau score with risk band
- Number of accounts, total balance, arrears amount
- Existing judgements, NLR consumer credit data

- **Decline Reasons** (red panel) — if the application was declined, every rule that failed appears here

Action buttons (right side panel):

Button	When to use it
Approve	Move to APPROVED status — ready to disburse
Decline	Reject — opens a modal to enter the reason (sent to client)
Send Contract	Trigger DocuSeal e-contract send
Activate Mandate	Send DebiCheck mandate to client for authorisation
Mark Disbursed	Loan disbursed — auto-creates loan record, decrements client balance, posts to ledger
Letters of Demand	Generate Section 129 NCA legal letter
Route to Head Office	Escalate to the Online Processing Team for review
View Statement	Generate branded loan statement (HTML)

4.3 Audit trail

Every status change is logged — who made the change, when, and what changed. Visible in the right sidebar.

5. Loan Book

URL: `/admin/loan-book`

The Loan Book is the live portfolio register — every active and historical loan.

5.1 What you see

Filters:

- Branch filter
- Status filter — Disbursed / In Arrears / In Default / Settled
- Date range (disbursed from / to)
- Search by client name, reference, or ID

Summary cards (5 across):

- **Total Loans** — count
- **Loan Book Value** — sum of outstanding balances
- **In Arrears** — count
- **In Default** — count
- **Avg Days Active** — portfolio age

Loan table:

Column	What it shows
Reference	Loan ref number
Client	Name + ID
Principal	Original amount disbursed
Outstanding	Live balance — orange if owing, green if zero
Monthly	Instalment amount
Status	Current status
Days Active	How long since disbursement
Days Overdue	If in arrears
Maturity In	Days until final payment due
Disbursed	Disbursement date
Maturity Date	Final payment date
Band	Credit risk band
Purpose	Loan purpose
Actions	View / Send SMS reminder (for arrears)

5.2 Sending an SMS reminder

For any loan in **IN_ARREARS** or **IN_DEFAULT** status, a message bubble icon appears in the Actions column. Click it to send a payment reminder SMS to the client.

5.3 Exporting

Click **Export** (top right) for a CSV of the filtered loan book — including bank account details for collection purposes.

6. Users (Clients & Staff)

URL: `/admin/users`

Manage all users — both clients (borrowers) and staff (admins).

6.1 Tabs

- **Clients** — borrowers in the system
- **Staff & Admins** — internal users

6.2 Clients tab

Filters:

- Branch filter
- Search by name, email, ID

Columns:

- Client identity (avatar, name, role)
- Match key (last 8 of UUID)
- Branch
- Compliance — ID Valid / ID Invalid badge
- Action

Click any client to open their **detail panel** — full profile, financial snapshot, all their loan applications, all uploaded documents, transfer between branches.

6.3 Staff & Admins tab

Shows internal users with their role and branch assignment.

+ Invite Staff (top right) — sends an email invitation to a new staff member with a sign-up link.

7. Cash Ledger

URL: `/admin/cash-ledger`

The Cash Ledger is the financial journal — every rand that moved in or out, automatic and manual.

7.1 What you see

Filters:

- Branch filter
- Date range (default: current month)
- Quick buttons: Today / Week / Month / All

Summary cards (6):

- Cash In (for the selected period)
- Cash Out (for the selected period)
- Net Position
- Loans Disbursed (cash out by category)
- Repayments Collected (cash in by category)
- Entry count

Ledger table:

Column	Notes
Date	Transaction date
Type	Cash In / Cash Out / Opening Balance / Closing Balance / Adjustment
Category	Loan disbursement / Repayment / Petty Cash / Expense / Bank Deposit / Bank Withdrawal
Description	Free text
Reference	Loan number or receipt number
Cash In	Amount in
Cash Out	Amount out
Running Balance	Live running total
By	Who created the entry

7.2 Automatic entries

The system auto-posts entries for:

- **Disbursements** — when a loan is marked DISBURSED, a `cash_out` entry is auto-created with the loan reference
- **Confirmed payments** — when a manual EFT proof is confirmed, a `cash_in` entry is auto-created

7.3 Adding a manual journal entry

Click **+ Add Journal Entry** to open the form. Use this for petty cash, bank deposits, expenses, or any other cash movement.

8. Incoming Payments

URL: `/admin/incoming-payments`

This page handles client-side payment submissions and recovery analytics.

8.1 Pending Manual Payment Proofs (top panel)

When a client submits proof of an EFT payment via the client portal, it lands here.

Each card shows:

- Client name + phone + loan reference
- Amount paid + payment type (Payment / Settlement)
- Bank reference number
- Proof link (screenshot or URL the client provided)
- How long ago submitted

Confirm — Marks payment as confirmed → posts to Cash Ledger → decrements outstanding balance → sends SMS + push + email to client. If it was a Settlement, loan status changes to SETTLED.

Reject — Prompts for a reason that gets sent to the client.

8.2 Admin Record Payment (with back-date)

Use this when a payment came in via another channel (e.g. cash at branch) and needs to be captured manually. You can backdate the payment.

Fields:

- Application ID / loan reference
- Amount
- Payment type (Partial / Settlement / Arrears)
- Date (default today, editable to backdate)
- Reference

Save → auto-posts to Cash Ledger and decrements loan balance.

8.3 Recovery Detail (lower section)

Shows all confirmed payments with:

- KPI cards (MTD Recoveries, Realised Profit, Active Payers)
- Filter tabs (Today / 7 Days / 30 Days / All)
- Searchable table

Click **Sync SureSystems** to pull DebiCheck collection results into the ledger.

Export CSV for accounting reconciliation.

The screenshot displays the Zwane Financial Services Admin Portal. The left sidebar contains navigation links: OVERVIEW (Dashboard, Analytics, Applications), FINANCE (Users, Mandates, Payments - Incoming/Outgoing), TOOLS (Credit Rules, Loan Book, Cash Ledger), and COMPLIANCE (SIGN OUT). The main content area features a top bar with a bell icon, user name 'Kurt SUPER ADMIN', and a profile icon. Below this are three action cards: 'Record Payment' (with a '+ Record' button), 'Manual Payment Proofs' (with a 'Refresh' button), and a 'Loading...' indicator. The KPI section shows 'TOTAL RECOVERIES (MTD)' as R 0.00, 'REALIZED PROFIT (MTD)' as R 0.00 (Contractual Fees & Interest), and 'ACTIVE PAYERS' as 0 (Unique clients this period). The 'RECOVERY DETAIL' section has filter tabs (TODAY, 7 DAYS, 30 DAYS, ALL), date pickers, and a search bar. An 'Export CSV' button is present. Below the filter tabs is a table with columns: DATE, CLIENT & ID, LOAN REF, STATUS, PAID IN, and BALANCE. A red error message is displayed: 'Error Loading Data: column manual_payments.payment_date does not exist'. On the right, the 'ALLOCATION (MTD)' section shows a 'PROFIT 0%' gauge. A red error banner at the bottom right states: 'ERROR FAILED TO LOAD RECOVERY DATA'.

9. Outgoing Payments / Disbursements

URL: `/admin/outgoing-payments`

Manage loan disbursements.

9.1 Tabs

- **Pending** — applications ready for disbursement
- **History** — completed disbursements
- **Comparison** — vs expected vs actual

9.2 Disbursement workflow

1. Application is approved
2. Appears in **Pending** tab
3. Tick the loans to include in a batch
4. Click **Generate Capitec CSV** — system creates a CSV file ready for upload to bank
5. CSV is PIN-protected (set in env) — enter PIN to download
6. Once bank processes, click **Mark as Disbursed**
7. System:
 - Updates status to DISBURSED
 - Sends client SMS / push / email
 - Posts cash_out entry to Cash Ledger
 - Creates the loan record (sets outstanding balance)

10. Credit Rules

URL: `/admin/credit-rules`

Configure the credit decision engine. This is where you decide who qualifies for what.

10.1 Score Bands

The main table is your **score bands** — the bridge from credit bureau score to loan offer.

Field	Notes
Band Label	e.g. "Excellent"
Score Range	e.g. 700–850
Risk Level	Low / Medium / High / Declined
Max Loan	What this band qualifies for
Rate (p.a.)	Interest rate applied
Max Term	Maximum repayment term
Decision	Approve / Manual Review / Decline
1st Loan Term	Optional restriction for first-time borrowers
Decline Message	Shown to client if their band declines
Active	Toggle

Edit any band by clicking the pencil icon. Add new band with **+ Add Band**.

Overlap warning — if two bands have overlapping score ranges (e.g. 650–750 and 700–800), a red banner appears. Fix the ranges to prevent unpredictable decisions.

10.2 Eligibility Rules

Hard pass/fail criteria checked before bands:

- Minimum credit score
- Minimum income
- Maximum DTI (Debt-to-Income ratio)
- Minimum age
- Must be employed
- No active judgements
- Not under debt review

Toggle on/off, edit thresholds, edit decline messages.

10.3 Simulate

Click **Simulate** (top right, purple button) to test a decision before going live. Enter:

- Credit score
- Income
- Monthly debt
- Age
- Employed / Has Judgements / Under Debt Review / First Loan

Click **Run Simulation** to see:

- The exact decision (Approved / Manual Review / Declined)
- Which band matched
- Max loan, rate, term applied
- Every rule that failed with the reason

Use this every time you change a band or rule to make sure it behaves as expected.

27

11. SACRRA Bureau Reporting

URL: `/admin/sacrra`

The SACRRA module handles your monthly Layout 700v2 submission to the four credit bureaux (Experian, TransUnion, XDS, Compuscan).

11.1 Dashboard tab

Shows:

- Compliance Score ring — % of records currently passing all rules
- Total records ready for submission
- Active issues count
- Bureau acceptance status (Pending / Accepted / Rejected per bureau)

11.2 Generating the monthly file

Click **Generate Compliance File** (top right).

A modal appears:

- **Submission Type** — Monthly (default) or Daily
- **Reporting Period** — leave blank for current month, or pick a past month for back-dated submissions
- Click **Generate**

The system:

1. Pulls every loan from the `sacrra_700_view`
2. Builds a 700-character fixed-width text file per Layout 700v2 spec
3. Creates header + data records + trailer
4. Encrypts the file with each bureau's PGP public key
5. Saves the file for download / submission

11.3 Submissions tab

History of every SACRRA file generated, with:

- Date generated
- Records included
- Submission status per bureau
- Download links

11.4 Bureaux tab

Per-bureau configuration:

- Enabled / Disabled
- Supplier Reference Number (10-char SRN issued by bureau)
- PGP public key
- Submission method (MOVEit auto-upload for Experian, Email for others)
- Submission destination (email address / MOVEit folder)

Configure each bureau once at setup — the system uses these settings for every monthly submission.

11.5 Rejections tab

Upload rejection responses from bureaux to see what failed and why. The system parses the error messages and shows which records to fix.

12. SACRRA Migration Validator

URL: `/admin/sacrra-validator`

This is the tool we use to validate an external loan book (e.g. from Zwane's old system) **before** importing it.

12.1 Why use this?

When you bring loans across from another lending system, the data needs to pass SACRRA Layout 700v2 rules before it can be reported to bureaux. This tool checks every record up front.

12.2 How to use it

Step 1: Upload Loan Book

Click the upload area and select a CSV file. The system auto-detects the header row.

Step 2: Column Mapping

The system tries to **auto-map** Zwane's column names to our SACRRA fields. Required fields are shown in bold. Adjust any incorrect mappings using the drop-downs.

Required fields:

- SA ID Number
- Surname, First Names
- Address
- Account Number
- Opening Balance, Current Balance
- Date Opened, Term (Months)

Optional fields (recommended):

- DOB, Gender, Mobile, Postal Code
- Status Code, Installment, Months in Arrears

Click **Validate Records**.

Step 3: Results

Four cards at the top:

- Total Records
- Valid count (green)
- Errors count (red)
- Compliance % (orange — the headline metric)

Tab filter: All / Failed Only / Passed Only

Table shows every record with:

- Row number
- SA ID
- Name
- Balance
- Status
- Issues (red list of every failed rule per record)

Step 4: Download

- **Errors CSV** — send back to Zwane to fix
- **Valid CSV** — cleaned, column-normalised, ready for import

12.3 What gets checked

- SA ID must be 13 digits with valid Luhn checksum
- DOB must match SA ID digits 1–6
- Gender must match SA ID digit 11 (0–4 = Female, 5–9 = Male)
- All required fields populated
- Balances ≥ 0 , within N9 limit (max R999,999,999)
- Dates valid YYYYMMDD, opened date in past
- Status codes valid (C/P/D/T/V/L)
- Months in arrears consistent with status (e.g. status C cannot have arrears)
- Mobile in valid SA format
- Postal code 4 digits

33

13. Analytics & Financials

13.1 Analytics

URL: </admin/analytics>

Deep-dive analytics — cohort analysis, risk metrics, vintage performance, recovery curves. Includes CSV export.

13.2 Financials

URL: </admin/financials>

The financial reporting module — income statement, balance sheet, cash flow. Date-range filters with YTD default. Export to CSV for board reports.

14. Settings

URL: `/admin/settings`

System configuration. Most of the time you only touch this at initial setup.

14.1 Tabs

- **My Profile** — Your own profile, password, avatar
- **Security** — Push notification settings, change password
- **User Management** — Add / edit / remove staff
- **Billing** — Subscription and invoice info
- **System Branding** — Company-wide settings (Super Admin only)

14.2 System Branding tab

Critical sections:

Company Identity

- Company name (appears everywhere)
- Company logo (upload or paste URL)

Company Legal Details (appear in contracts and NCA disclosures)

- NCR Registration Number
- Company Registration Number
- VAT Number
- Branch Code (for contracts)
- Company phone
- Physical address
- Postal address

Company Banking Details (used by clients for manual EFT payments)

- Bank name
- Account holder name

- Account number
- Branch code
- Account type
- Reference prefix (clients use this + their loan ID)
- **Live preview** at the bottom showing exactly what clients see

Theme Colours

- Primary / Secondary / Tertiary
- Live gradient preview

Login Styling

- Background wallpaper
- Overlay colour
- Auth page carousel slides

Click **Save Changes** to commit.

The screenshot displays the ZWANE Financial Services Admin Portal. On the left is a sidebar with the following sections:

- OVERVIEW**
 - Dashboard
 - Analytics
 - Applications
- FINANCE**
 - Users
 - Mandates
 - Payments
- TOOLS**
 - Credit Rules
 - Loan Book
 - Cash Ledger
- COMPLIANCE**
 - SACRRA
 - Minimum Validator

At the bottom of the sidebar is a **SIGN OUT** button and the text "Powered by Mint Platforms".

The main content area is titled **My Profile** with the subtitle "MANAGE YOUR PERSONAL ACCOUNT DETAILS.". It features a navigation bar with links: **My Profile** (active), Security, User Management, Billing, and System Branding.

The profile card shows:

- Initials: **K**
- Name: **Kurt Von Schaeffer**
- Email: **vonschaefferk@gmail.com**
- Role: **SUPER ADMIN**

Below the profile card are two input fields:

- FULL NAME**: Kurt Von Schaeffer
- CONTACT NUMBER**: (empty)

A **Save Changes** button is located at the bottom right of the profile card.

15. Common Workflows

15.1 Approve and disburse a new loan

1. **Applications** → click application → opens **Application Detail**
2. Review **Credit Check** section — score, decline reasons (if any)
3. Review **Affordability** — toggle income sources if needed
4. Click **Approve**
5. Click **Send Contract** — client signs via DocuSeal
6. Once signed, click **Activate Mandate** — client authorises DebiCheck via SureSystems
7. Once authorised, status becomes APPROVED
8. Go to **Outgoing Payments** → Pending tab → tick the loan → **Generate Capitec CSV** → upload to bank
9. Once bank confirms paid, click **Mark as Disbursed**
10. Client gets SMS / push / email — loan balance is now tracked

15.2 Confirm a manual EFT payment

1. Client submits proof of payment via client app
2. Goes to **Incoming Payments** → Pending Manual Payment Proofs panel
3. Open the card, check the proof (screenshot link or reference number)
4. Verify amount matches your bank statement
5. Click **Confirm**
6. Automatically: posts to Cash Ledger, decrements loan balance, sends client SMS / push / email

15.3 Record a payment that came in via cash or other channel

1. **Incoming Payments** → Admin Record Payment panel
2. Pick application
3. Enter amount and reference
4. Backdate if needed
5. Save → auto-posts to Cash Ledger and decrements balance

15.4 Send arrears reminders

1. **Loan Book** → Status filter = In Arrears
2. For each row, click the SMS icon in Actions column
3. Client receives reminder

15.5 Generate and submit monthly SACRRA file

1. End of month
2. Go to **SACRRA** → **Generate Compliance File**
3. Confirm settings (Monthly type, current period)
4. Click Generate
5. File is built, encrypted per bureau, ready to submit
6. For Experian — auto-uploaded via MOVEit
7. For TransUnion / XDS / Compuscan — download **.pgp** file and email per bureau settings

15.6 Validate Zwane's loan book before import

1. **SACRRA Migration Validator** → upload Zwane's CSV
2. Adjust column mappings if needed
3. Click Validate Records
4. Download **Errors CSV** → send to Zwane for fixes
5. When file passes, download **Valid CSV** → use for database import

15.7 Add or update a staff member

1. **Users** → Staff & Admins tab
2. Click **+ Invite Staff** to invite a new user — they get an email with sign-up link
3. To change an existing user's role or branch, click their row → edit modal opens

15.8 Change credit policy

1. **Credit Rules**
2. Edit existing band or rule, or add new one
3. Click **Simulate** to test a few example clients
4. Confirm the decisions are correct before saving

15.9 Route a complex case to Head Office

1. Open the **Application Detail** for the loan in question
 2. Click **Route to Head Office** in the action panel
 3. Application now appears in Head Office's queue with a routed marker
 4. Original branch can still see the application but cannot action it until Head Office reviews
-

16. Troubleshooting

Login fails

- Check email and password
- Use "Forgot password" to reset
- Confirm you have an active account — ask the Super Admin

Pages slow to load

- Refresh the page
- Check internet connection
- Try again in a few minutes

Can't see a client / application

- Check your branch filter — you might only have access to your branch's data
- Check the status filter — old or archived items may be hidden

Client can't see banking details on the EFT screen

- **Settings** → **System Branding** → **Company Banking Details** — ensure all fields are filled in

SMS notifications not sending

- Check **System Status** indicator on Dashboard
- Contact your platform administrator

A disbursement marked as paid but no client SMS

- Check the client's `cell_tel_no` field on their profile — must be valid SA format
- Check SMS provider quota with platform administrator

Cash Ledger doesn't reflect a payment

- Confirm the payment was set to "Confirmed" — pending entries don't update balances
- Check the date filter on the Cash Ledger

SACRRA file generated but no records

- Check the `sacrra_700_view` — only loans with eligible statuses appear
- Check date filter on the SACRRA page

Credit score not updating

- Check **Settings** that EXPERIAN_USERNAME and EXPERIAN_PASSWORD are set
 - Confirm the client's ID number is correct
 - View the credit check error log on the application detail page
-
